

# **SWIFTLANCE**

**A DECENTRALIZED PLATFORM THAT LINK CLIENTS  
AND EXPERTS FOR ONLINE TASKS/JOBS**

**Version 1.0**

Version 2.0 will be released in Q1 of 2019

## ABSTRACT

A secure and fast cryptocurrency built on Ethereum protocol for payment means between clients and experts of various online industries. This platform is designed to eliminate high fees, Insecurity, location barrier incurred in using other traditional outsourcing platforms. With Blockchain and other technology, a decentralized online job market place is created.

## INTRODUCTION

As the population of the world keeps increasing rapidly, Millions of internet users are faced with several projects, tasks, research, assignment that need to be completed within a given timeframe. Some of these users surf the web helplessly with no precise or accurate solution to their problem!

Freelancing serve as a major source of income for many users with skills, and knowledge of numerous online industries. Hence, a medium is required where these skills can be utilized judiciously and rewarded (payment) for their effort and time.

Geographical location, means of payment, insecurity are no barriers to user of swiftlance Platform.

## ENVIRONMENT

The ever-increasing demand for users with skills to solve or complete online jobs/tasks birth various platforms that serve as intermediary or meeting place between potential clients and experts.

However, these platforms have various limitations, some of which will be discussed in the next section.

## WHAT IS A DECENTRALIZED PLATFORM?

This is a platform which transfer control from the central body to its users. It is by no means a centralized platform when the users have control to freely use the platform, and not limited by high fees.

## PROBLEMS

The problem of discrimination in jobs/tasks allocation due to location barriers, racisms. Some traditional platforms prefer to allocate task/jobs to users in certain countries/regions. This discourages and limits users of the unfavoured regions irrespective of their expertise level and exposure.

The problem of insecurity of funds and exorbitant fees; In the case of dispute after task completion, there are little or no way of resolution for both parties involved.

The fees involved with transactions are often high and even varies, which implies, the higher the job fee (cost), the higher the fee deducted from the users.

## SOLUTION

The platform is designed in a decentralized way with its own Token (SWL) to pay users for online jobs successfully completed at a minimal fee, with a fast and secure means of payment.

All users can see reviews and past works of experts of various online industries irrespective of their region/location, chat to negotiate and reach an agreement before task allocation.

Online support is available to resolve any dispute without any bias decision.

## WHAT IS SWIFTLANCE?

Swiftlance is a decentralized outsourcing platform based on Blockchain with aim of providing several online jobs task for user with skill in various online industries.

## WHAT IS SWIFTLANCE TOKEN?

This is the token (erc 20) associated with swiftlance platform and serve as payment option within the platform users/community

## DETAILS OF SWIFTLANCE TOKEN

Name: Swiftlance Token

Ticker: SWL

Decimal: 8

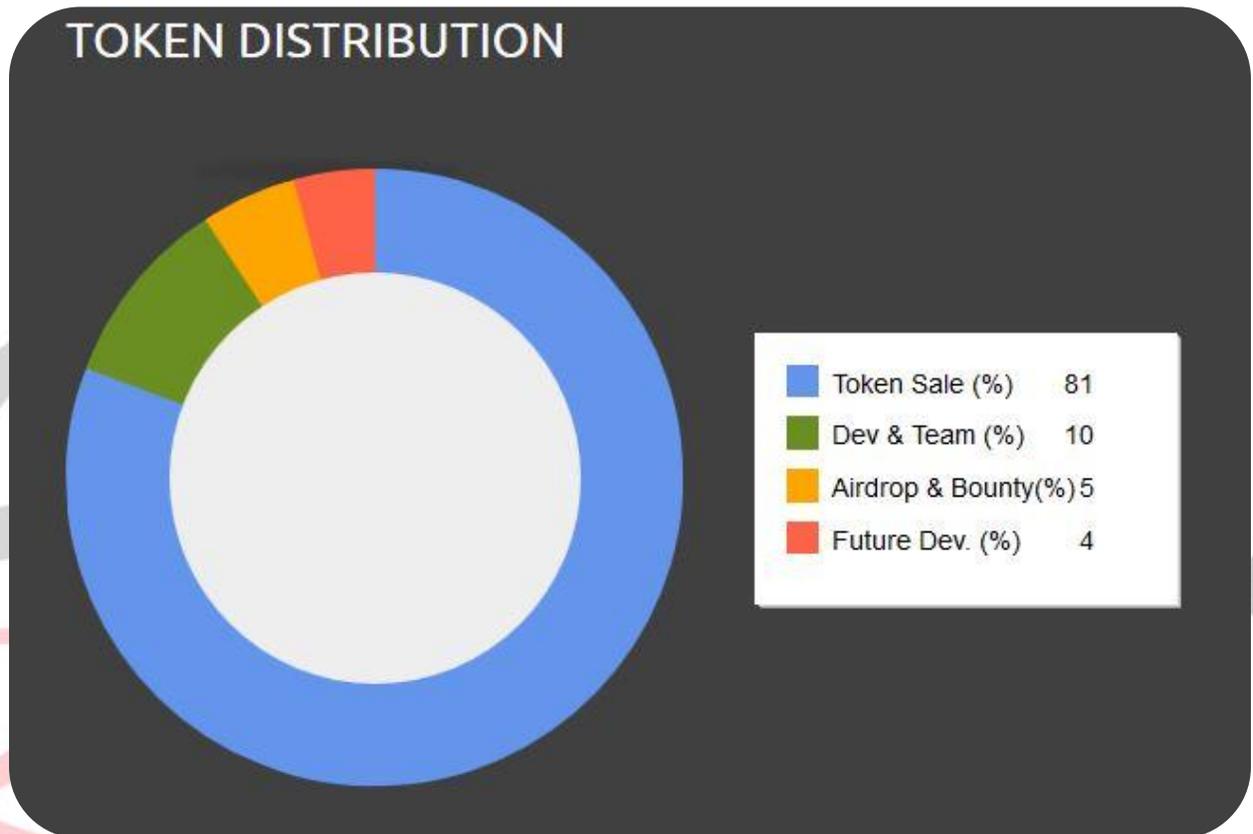

Total Supply: 8,000,000,000

Token Sale: 6,500,000,000(Indicate scale)

Price: 1 ETH = 20,000,000 SWL
